Professional Summary

I'm a Web Product Developer who loves to bring product Ideas to life. I craft beautiful and performant Web Applications with Javascript, Typescript, Nuxt, Vue.js and more.. My experience building web products have honed my skills and made me truly confident in my abilities to take on new challenges.

Skills

- Front-End Development: HTML5, CSS3/SASS, JavaScript (ES6+)
- Back-End Development: Node.js, Express.js, Laravel, Adonis.js
- JavaScript Frameworks: Vue.js, Nuxt.js, React.js
- Databases & Cloud Platforms: Firebase, Google Cloud Platform (GCP)
- Version Control: Git
- State Management: Vuex, Redux, Pinia
- CI/CD: Setting up and maintaining pipelines
- Soft Skills: Cross-functional collaboration, project management, problem-solving

Experience

(2021 - 2023)
Full Stack Developer – *Pikcells Ltd, UK , Huddersfield*
- Designed and developed scalable front-end systems for complex web applications.
- Delivered responsive, user-friendly interfaces resulting in increased user engagement.
- Built a reusable UI component library, streamlining development.

- Developed an innovative JavaScript framework and utility suite, boosting internal project efficiency.
- Fostered strong collaboration with cross-functional teams (UI/UX, product, backend) to ensure successful product development.
- Engineered websites, landing pages, and web apps leveraging Vue.js and Nuxt.js.
- Built and maintained server-side logic using Laravel.
- Developed and managed APIs for seamless client-side integration.
- Optimized applications for maximum performance and scalability.

Oct 2020 – Dec 2020
Data Science Intern – *Collinson, London*

- Performed data quality checks and data pre-processing tasks to ensure clean data for analysis.
- Conducted data analysis to extract valuable insights that informed key business strategies.
- Employed machine learning techniques for predictive analytics.
- Contributed to data science team discussions, proposing improvements to data processing workflows.

Feb 2019 – 2020
Full Stack Developer – *GoldenOx, Remote (2020)*

- Designed, developed, and maintained user-facing interfaces (client, admin, marketing) using Vue.js and TypeScript.
- Built and maintained server-side logic using Express.js.
- Developed and managed APIs for client-side consumption.
- Implemented Firebase Admin for server-side functionality and handling HTTP requests.
- Managed real-time data updates and synchronization across the application.
- Integrated front-end and back-end components to ensure seamless application functionality.
- Wrote unit and integration tests to ensure application reliability and functionality.
- Debugged and troubleshooted issues across the full stack.
- Implemented efficient and secure methods for data retrieval and storage.
- Collaborated with designers and stakeholders to deliver projects according to requirements.

- Implemented security measures to safeguard sensitive data.
- Created and maintained technical documentation (API documentation, user guides, system architecture diagrams).

Education

(2020 – 2021)
University of Salford, Manchester – *Master's Degree in Data Science*

(2016 – 2020)
Eastern Mediterranean University, Northern Cyprus – *Bachelor's Degree in Computer Science*

Certifications

- Complete Machine Learning & Data Science Bootcamp 2021, AWS
